

SCANDAL MURTY

PROFESSIONAL SUMMARY

Motivated and detail-oriented Data Analytics student with a strong logical aptitude and a comprehensive understanding of technology and artificial intelligence. Currently leveraging hands-on experience in precision work as a Production Operator at General Dynamics Mission Systems, where I meticulously laminate and bond electrical components. Eager to apply a blend of technical knowledge, analytical skills, and a proven ability to handle complex tasks to a challenging role in the analysis field.

EXPERIENCE

SENIOR PRODUCTION OPERATOR GENERAL DYNAMICS MISSION SYSTEMS

Apr 2023 - Current

Proficient in executing company-standard bonding and laminating procedures for printed wiring boards and various electronic components. Demonstrated ability to meticulously follow written instructions and develop a comprehensive understanding of operational tasks to ensure accurate and efficient completion. Utilize the Solumina database to streamline manufacturing operations for space missions. Developed an automated system for material inventory control in Plastics.

INBOUND ASSOCIATE TARGET

Aug 2022 - Mar 2023

Experienced in collaborative merchandise trailer unloading processes, including sorting lines, and operating powered equipment to efficiently move product. Following the unload, responsible for stocking the sales floor and back stocking newly received merchandise.

DELIVERY DRIVER DOMINO'S

Nov 2021 - Jun 2022

Versatile Delivery Driver responsible for the safe and timely delivery of orders to residential customers using a personal vehicle. Also proficient in various in-store operations, including dishwashing, oven tending, food preparation, equipment cleaning, and taking phone orders. Demonstrated consistent reliability and commitment to friendly customer service in all interactions.

ABOUT ME

My passions in computing are driven by a love for creativity, logic, and order. This manifests in my enjoyment of analyzing data, the hands-on process of building PCs, the creative freedom of 3D design, and exploring the potential of artificial intelligence. I am particularly excited about leveraging data to enhance efficiency in our daily lives.

EDUCATION

MESA COMMUNITY COLLEGE
